

Assignment 1: E-Commerce Mobile Application

Detailed Business Scenario

A retail company wants to launch a mobile shopping application within six months. Requirements change frequently because marketing teams continuously collect customer feedback. Teams must prioritize features such as registration, product catalog, wishlist, order tracking, payment gateway integration, reviews, and recommendation engines. Stakeholders expect incremental releases every sprint.

Student Activities

- Identify stakeholders and define product vision.
- Create at least 20 product backlog items in user story format.

Answer:

In this case, I feel like there could be primarily **four** stakeholders; they are as follows:

1. The retail company that wants the mobile application.
2. The marketing team that continuously collects the customer feedback, as they have the ability to influence the outcome of the app.
3. The developer team that is going to implement the application.
4. The customers (end users) that are going to use the application for their shopping.

Product Vision:

Build a mobile shopping app that provides customers with a convenient shopping experience while helping the retail company increase their customer engagement & sales through frequent incremental improvements.

User Story 1:

Title: A New Registration

Description: As a customer, I want to register an account using my email or phone number so that I can securely shop, save my information, and track my orders.

Given that a new customer is on the registration page.

When the customer enters valid details and clicks Register.

Then the account is created successfully, and a confirmation message is displayed.

Acceptance Criteria:

The customers can register using email or phone number.

Required fields (name, email/phone, and password) must be filled.

Passwords must meet security requirements.

Duplicate email or phone numbers are not allowed.

The customers receive a successful registration confirmation.

User Story 2:

Title: Browsing Product Catalogue

Description: As a customer, I want to browse products by category so that I can easily find products I want to buy.

Given that the customer is on the home page.

When the customers select a category or search for a product.

Then the system displays matching products with their details.

Acceptance Criteria:

Customers can view product categories.

Customers can search products.

Customers can filter by category.

Product details include image, price, and description.

Selecting a product opens its details page.

User Story 3:

Title: Wishlisting a product

Description: As a customer, I want to save products to my wishlist so that I can purchase them later.

Given that the customer is viewing a product.

When the customer taps "Add to Wishlist."

Then the product appears in the customer's wishlist.

Acceptance Criteria:

The customer can add a product to the wishlist.

The customer can remove a product from the wishlist.

The wishlist is saved to the user's account.

The wishlist is available after logging in again.

User Story 4:

Title: Making a Payment

Description: As a customer, I want to pay using different payment methods so that I can complete my purchase safely.

Given the customer is on the checkout page.

When the customer selects a payment method and completes payment.

Then the order is confirmed and a payment success message is shown.

Acceptance Criteria:

The customer can choose UPI, card, or net banking.

Payment information is validated.

Successful payment creates an order.

Failed payment displays an error and allows retry.

User Story 5:

Title: Tracking an order

Given the customer has placed an order.

When the customer opens My Orders.

Then the latest order status and estimated delivery date are displayed.

Acceptance Criteria:

Customers can view all placed orders.

Customers can see order status (Confirmed, Shipped, Out for Delivery, or Delivered).

The customer can view the estimated delivery date.

Status updates automatically when the order progresses.

User Story 6:

Title: Logging into Account

Description: As a customer, I want to log into my account so that I can access my wishlist, orders, and saved information.

Given a customer has already registered.

When the customer enters valid login credentials and clicks Login.

Then the system authenticates the customer and opens the account dashboard.

Acceptance Criteria:

The customer can log in using a registered email or phone number.

The customer must enter the correct password.

Invalid credentials display an error message.

Successful login redirects the customer to the home page.

The customer remains logged in until they log out.

User Story 7:

Title: Adding a product to cart

Description: As a customer, I want to add products to my shopping cart so that I can purchase multiple items together.

Given a customer is viewing a product.

When the customer clicks Add to Cart.

Then the selected product is added to the shopping cart with the chosen quantity.

Acceptance Criteria:

The customer can add a product to the cart.

The customer can update the product quantity.

The customer can remove products from the cart.

Cart displays the total price of selected items.

Cart contents remain saved after login.

User Story 8:

Title: Writing and Reading Product Reviews

Description: As a customer, I want to read and write product reviews so that I can make decisions and share my experience.

Given the customer has purchased a product.

When the customer submits a rating and review.

Then the review is saved and displayed on the product page.

Acceptance Criteria:

Customers can view or read reviews for each product.

The customer can give a star rating.

Customers can write a review after purchasing the product.

User Story 9:

Title: Checking Out and Placing an Order

Description: As a customer, I want to place an order so that I can purchase my selected products.

Given the customer has items in the shopping cart.

When the customer reviews the cart and clicks Place Order.

Then the system creates an order and proceeds to the payment page.

Acceptance Criteria:

The customer can review all items before checkout.

The customer can update the delivery address.

The customer can view the total amount, including taxes and shipping.

The customer confirms the order before payment.

The order is completed.

User Story 10:

Title: Forgot Password

Description: As a customer, I want to reset my forgotten password so that I can regain access to my account.

Given the customer is on the login screen.

When the customer selects "Forgot Password" and enters a registered email or phone number.

Then the app sends an OTP or password reset link to the customer.

Acceptance Criteria:

The customer can select the Forgot Password option.

The customer enters a registered email or phone number.

The app sends an OTP or reset link.

The customer can create a new password after verification.

The customer receives a confirmation after password reset.

User Story 11:

Title: Changing a Password

Description: As a logged-in customer, I want to change my password so that I can keep my account secure.

Given the customer is logged into the application.

When the customer enters the current password and a valid new password.

Then the app updates the password and confirms the change.

Acceptance Criteria:

The customer can access Change Password in account settings.

The customer enters the current password.

The customer enters and confirms the new password.

A new password must satisfy password rules.

The app displays a success message after updating the password.

User Story 12:

Title: Logging Out

Description: As a customer, I want to log out of my account.

Given the customer is logged into the application.

When the customer taps Logout.

Then the customer session ends and the application returns to the login screen.

Acceptance Criteria:

The customer can access the Logout option.

The app asks for confirmation before logging out.

The customer session is terminated.

The customer is redirected to the login or welcome screen.

User Story 13:

Title: Password Checking (Validation)

Description: As a customer, I want the app to validate my password while creating or changing it so that my account remains secure.

Given a customer is creating or changing a password.

When the customer enters a password that meets all validation rules.

Then the app accepts the password and allows the registration or password update to continue.

Acceptance Criteria:

Passwords must contain at least 8 characters.

The password must include one uppercase letter.

The password must include one lowercase letter.

The password must include one number.

Passwords must include one special character (e.g., @, #, !, \$).

The app displays an error message if the password does not meet the requirements.

The app accepts the password only when all validation rules are satisfied.

User Story 14

Title: Updating Profile

Description: As a customer, I want to update my profile information so that my account details remain accurate.

Given the customer is logged in.

When the customer updates profile details and taps Save.

Then the app saves the updated profile information.

Acceptance Criteria:

The customer can edit the name, phone number, and email.

The customer can save updated information.

The app validates required fields.

The success message is displayed after the update.

User Story 15:

Title: Viewing User Profile

Description: As a customer, I want to view my profile information so that I can verify my account details.

Given the customer is logged in.

When the customer opens the Profile section.

Then the system displays the customer's account details.

Acceptance Criteria:

The customer can open the profile page.

The app displays name, email, phone number, and address.

The information shown is up to date.

User Story 16:

Title: Searching for a product

Description: As a customer, I want to search for products by name or keyword so that I can quickly find the items I need.

Given the customer is on the home page.

When the customer enters a product name in the search bar.

Then the system displays matching products.

Acceptance Criteria:

The customer can enter keywords in the search bar.

Matching products are displayed.

"No results found" is shown if nothing matches.

User Story 17:

Title: Viewing the order history

Description: As a customer, I want to view my previous orders so that I can check my purchase history.

Given the customer has placed orders.

When the customer opens Order History.

Then the app displays the list of previous orders.

Acceptance Criteria:

The customer can open the Order History section.

The app displays all previous orders.

Each order shows the date, items, amount, and status.

User Story 18:

Title: Cancel an Order

Description: As a customer, I want to cancel an order.

Given the customer's order has not been shipped yet.

When the customer selects Cancel Order and confirms.

Then the order is cancelled and the status is updated.

Acceptance Criteria:

Customers can cancel eligible orders.

The app asks for confirmation.

Order status changes to Cancelled.

The customer receives a cancellation notification.

User Story 19:

Title: Receiving Order Notifications

Description: As a customer, I want to receive notifications about my order so that I stay updated on its status.

Given the customer has placed an order.

When the order status changes.

Then the app sends a notification with the latest update.

Acceptance Criteria:

The customer receives notifications when an order is confirmed.

The customer receives shipping updates.

The customer receives delivery confirmation.

Notifications are available in the app.

User Story 20:

Title: Deleting User Account

Description: As a customer, I want to delete my account so that I can permanently remove my personal information from the application if I no longer want to use it.

Given the customer is logged into the application.

When the customer selects Delete Account, confirms the action, and successfully verifies their identity.

Then the app deletes the account, logs the customer out, and redirects them to the login screen.

Acceptance Criteria:

The customer can access the Delete Account option from the profile/settings page.

The app asks for confirmation before deleting the account.

The customer must verify their password before deletion.

The customer's account is permanently deleted after confirmation.

The customer is logged out and redirected to the welcome/login screen.
